Master's Thesis Anton Bratwurstbrötchen

Fancy Thesis Title

Sep 14, 2023

Author:	Anton Bratwurstbrötchen
Supervisor:	Prof. Dr. Stephan Krusche
Advisor:	Jolanda Krümelmonster, M.Sc.
Presentation date:	Sep 11, 2023

1. Feedback: Since the attention span of the audience is rather short, try getting to the problem as fast as possible. Several slides in the presentation display redundant or repetitive information and could be deleted

Response: To get to the problem earlier in the presentation as well as to present only relevant information, some of the slides are removed (Agenda) and some of them are merged (Context, Motivation and Objectives). Therefore the "Problem" slide is now at slide 4.

2. Feedback: The structure of the presentation is rather unique; it would be great if you could help the audience to follow it easier.

Response: To help the audience to follow the presentation easier, a progress-bar was added at the bottom of the slides to show the milestones of the presentation and highlight the one that indicates the current slide.
